BLOCKUHR

A real train station clock from Deutsche Bahn stands at the beginning of the BLOCKUHR (German for CUBICAL CLOCK). This modern combination of a hall clock and a bar table is a station clock with a two sided time display that rests on top of a hand welded steel base. From the few clocks available vierkant chooses the best, modifies and modernises them to make them state of the art time-pieces. The clocks of this series are all made for a long working life and speak a formal language with completely timeless appeal.
